

Liro design line

Liro clip-on shelves

Thin-walled and highly stable metal shelves that work with and without rails.

Liro shelves fit with the customer's style as they can be combined with rails for a tailor-made look. Users can choose to pair the shelves with rails made of solid oak, which are the perfect complement to wooden front panels and warm colours, or, alternatively, they can opt for glass, compact laminates, aluminium or another material. Without rails, Liro shelves ooze calm sophistication.

Liro is defined by its clean lines and uncomplicated shape, yet the details of the new design reveal peka's exceptional expertise in metal processing. The shelves are made of top-quality coated sheet steel, folded with millimetre precision: every angle is exactly right. This material, so typical of peka products, allows designs with very thin walls but no compromise on stability. The shelves are easy to clean thanks to their even surface, and they can be recycled as a single material at the end of their life.

Technical data

Design line	Liro
Colour	white/silver/anthracite
Railing insert set	natural oak/stained oak
Compatible with	Hochschrank Standard, Magic Corner Comfort, Magic Corner Standard

Features and benefits

- Works with and without rails
- Versatile design enables multiple styles: rails made of solid oak or other material of choice
- Maximum use of space thanks to thin-walled shelves
- Closed shelf bases stop bottles from toppling and small items from falling through
- Shelves can be easily removed for cleaning and clipped back in place
- Optional accessories allowing customised use of shelf space: oak railing inserts, non-slip mats made from silicone, magnetic dividers
- Harmonises perfectly with standard drawers
- Unique wood/white and wood/silver combinations

Technical characteristics

- Easy to retrofit
- Single shelf design suitable for multiple customer segments
- Rails can be customised for a personal touch
