

Internal pull-out Porter

Sturdy standard-extension runner for custom-designed wooden pull-outs in a base unit

The standard-extension runner provides the basis for custom-designed base unit pull-outs made of wood.

Porter Basic enables custom-made pull-out boxes to be used in a base unit. The standard-extension pull-out comes fully pre-assembled and can be easily mounted on the floor of a base unit using four screws. Its high load capacity of 100 kg makes it highly versatile.
