

# Corner pull-out Magic Corner Standard

Practical corner unit pull-out with attached front panel

When the door is opened, the attached shelves swivel out and the back shelves automatically glide forward into the front of the cabinet.

Magic Corner Standard lets you make full use of the storage space in a corner. As if by magic, it also brings the items stored behind to the front, saving you having to rummage around in the back of the cabinet. Magic Corner Standard is a smart, sophisticated system that gives you access to the full contents of your units. When the door is opened, the front shelves swivel out of the unit in a smooth, circular movement and the back shelves automatically glide forward into the front of the cabinet.

## Technical data

<b>Design line</b>	Fioro/Liro/Libell/Excellent
<b>Handle-free fronts</b>	optional

<b>Colour</b>	white/silver/anthracite
<b>Load capacity</b>	32 kg
<b>Interior width (LB)</b>	860-971/960-1071 mm
<b>Interior depth min. (LT)</b>	500 mm
<b>Interior height min. (LH)</b>	540 mm

## Features and benefits

- A single movement brings items stored in a hard-to-reach corner to the front part of the unit
- Two units can be used with a single mechanism
- The smooth movement prevents stored items from falling out
- Rectangular shelves for optimal use of storage space
- Plenty of room, even for bulky objects and heavy appliances

## Technical characteristics

- Sturdy pull-out with reliable movement and smooth running action
- Built-in Softclose mechanism ensures that the unit can be closed smoothly and silently
- Two height-adjustable shelves for flexible and adaptable storage
- Makes maximum use of space even in narrow-fronted units (from 400 mm), as the back shelves remain inside the unit
- Tool-free 3D adjustment of the front panel and width adjustment of the back-wall frame
- Efficient mechanism assembly thanks to ClickFixx and detachable shelves
