

Shoe rest

Shoe rest that can be cut to the required size

Cut the plastic profile to the width you need and place it in the cupboard or wardrobe of your choice.

A neat solution for your shoes! The shoe rest is a plastic rack with two inclined rows – the perfect place for storing and drying shoes. Its closed base prevents dirt and water from escaping and is easy to clean. The shoe rest can be cut to the required width and mounted on a pull-out shelf or placed in a cupboard or wardrobe.

Technical data
