

Waste system

Oeko Complet Aqua Q

Waste system with space for boiling water system or water filter

The waste system including a sturdy front pull-out and space for a boiling water system or water filter

Oeko Complet Aqua is designed for easy, hassle-free installation in a 600-mm unit alongside a boiling water system such as Quooker or a conventional water filter. Replacing a CO2 cylinder is also very simple. The patented holder system means that waste bags can be clipped into the frame quickly and easily. The bins are generously sized, so that you can fill each bag to the brim. The metal shelf/lid is a handy place to store a range of small items. The waste system is equipped with strong, stable extension runners. The height is fixed and suitable for EU kitchens.

Technical data

Compatible with	Quooker Pro3, Quooker Pro3 with Cube, EVOfilter
Type	Q
Unit width (EB)	600 mm
Colour	anthracite
Load capacity	0-60/110 kg
Volume	40 l
Interior width (LB)	562-568 mm
Interior depth min. (LT)	495 mm
Interior height min. (LH)	435 mm
Height (H)	425 mm

Features and benefits

- Leaves space to the side for a boiling water system or a water filter
- Effortless replacement of CO2 cylinder
- Waste bags can be filled to the brim in the 40-litre bin
- Patented holder system: 1-2 waste bags of various sizes (15 to 50 litres) can be clipped into the frame quickly and easily
- Generously sized bins with fixed metal shelf offering extra storage space

Technical characteristics

- The system can be fitted on either side and is compatible with all unit heights and depths, ensuring maximum design flexibility
- Can be fitted on right or left
- The water unit is neatly separated from the waste system
- Unit is pre-assembled by peka and runners are easy to fit and remove, allowing for quick on-site installation
- Integrated punching template provides simple, time-saving assembly aid
- Water equipment can be retrofitted easily by third parties
